

01 Hairpin motors

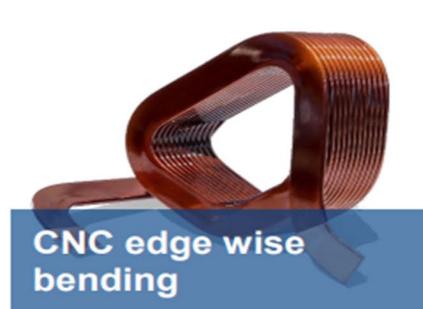

- CNC bending**
- Low tooling cost
 - Easy ramp up
 - Economical even for small volumes

02 Knuckle hairpin motors

- CNC bending + CNC pulling**
- Production of „aerospace hairpins“ with pulling movement

03 Axial + radial flux motors

- CNC edge wise bending**
- Unmatched quality
 - No axial thickening
 - Max. power density
 - Double coils

04 Small conductors

- CNC bending**
- Unmatched flexibility
 - Basically any conductor / busbar can be made
